What is this product?

Type

This product is a French Undertaking for Undertaking for Collective Investment in Transferable Securities (UCITS), incorporated as a French Common Fund (FCP).

The Fund is subject to the approval of the Autorité des marchés financiers (AMF).

Term and termination (by the initiator)

The Fund has a term of 99 years. The Management Company may extend this term. The Fund may also be dissolved early on the Management Company's initiative. The terms for dissolving the Fund are described in more detail in the Fund's prospectus.

Objectives

The objective of the fund (the "Fund") is to outperform the benchmark, the MSCI World 100% Hedged to EUR Net Total Return Index (denominated in euro and calculated with net dividends reinvested), net of management fees, over a recommended investment horizon of at least five years. The portfolio's management style will never consist in tracking the composition of a benchmark index. However, the benchmark may be used as an ex-post performance indicator.

The investment strategy consists of active and discretionary management of a portfolio of equities issued by firms of any market capitalisation and operating in any economic and geographic sector (including emerging countries) and denominated in EUR or international currencies. The Fund will invest in equities on listed markets, conducting a detailed analysis of the companies on those markets, with a focus on a longer-term investment horizon and selecting issuers which, in Tikehau Investment Management's view:

-have a clear business model with potential sources of growth and attractive ROCE that can be sustained over multiple years thanks to their robust competitive advantages;

-are run by a management team that is aligned with shareholders and employs judicious use of capital;

-are priced low enough to offer a potentially attractive internal rate of return (IRR) over a five-year investment period.

Up to 110% of the Fund's assets may be exposed to equities issued by issuers of all market capitalisations and from all geographical regions. Net exposure to the equity markets is between 90% and 110%. The Fund can have exposure of up to 10% of its assets in money market investments. The Fund may use (i) futures, forwards and other derivatives for the purpose of hedging currency risk and (ii) warrants to gain exposure to equity risk. Currency risk exposure may represent up to 110% of the Fund's assets.

Fund unitholders may redeem Fund units or shares daily on request, in accordance with the provisions of the prospectus.

What happens if Tikehau Investment Management is unable to make the payments?

The Fund jointly owns financial instruments and deposits separately from the Management Company. If the latter failed, the product's assets held by the custodian would not be affected. If the Custodian failed, the risk of a financial loss on the product would be mitigated by the legal segregation of the custodian's assets from the product's assets. Any losses are not covered by an investor compensation or guarantee system.

What are the costs ?

The person who sells you this product or who provides advice on it may charge you additional fees. If so, said person shall inform you of such fees and of the impact they have on your investment.
