What is this product?

Type

This product is a sub-fund of Tikehau Fund, a company organized as a variable capital investment company (société d'investissement à capital variable or "SICAV") under Part I of the Investment Fund Law. The prospectus and periodic reports are prepared for the entire SICAV. The assets and liabilities of the various sub-funds are segregated. In addition, any shareholder has the right to exchange their shares in the Sub-fund for shares of other sub-funds of the SICAV subject to the conditions outlined in the SICAV's prospectus.

The Sub-Fund is subject to the approval of the Commission de Surveillance du Secteur Financier (CSSF).

Term and termination (by the initiator)

The SICAV was created for an indefinite term. The Sub-fund may be dissolved early at the initiative of the Fund's board of directors. The terms for dissolving the Sub-fund are described in more detail in the SICAV's articles of association.

Objectives

Tikehau SubFin Fund (the "Sub-fund") is a sub-fund of Tikehau Fund (the "Fund"). The Sub-fund aims to achieve annual outperformance of the composite benchmark, the 50% ICE BofA Contingent Capital Index (hedged to EUR) + 50% ICE BofA Euro Financial Subordinated & Lower Tier-2 Index, net of management fees, over an investment horizon of three years. Investors should note that the Sub-fund is actively managed and uses a benchmark index solely as an ex-post performance indicator and, where relevant, to calculate the performance fee.

The investment strategy is to manage, on an active and discretionary basis, a diversified portfolio mainly composed of private and public debt instruments (mostly subordinated debt instruments: Tier 1, Upper or Lower Tier 2 or others). The portfolio will have a minimum average rating of B+ (S&P's rating), or B1 (Moody's rating), while the minimum rating will be CCC+ or equivalent. The Sub-Fund may invest up to 130% of its net assets in debt instruments issued by entities in the private or public sectors and located primarily in the Eurozone (including convertible bonds and contingent convertible bonds ("CoCo"), up to 100% of the net assets of the Sub-Fund).

Debt securities that belong to the subordinated financing category pose a greater default risk, in exchange for a higher reward. A debt is known as subordinated when its repayment depends on other creditors (senior creditors and unsecured creditors) being repaid first. Thus, subordinated creditors will be repaid after unsecured creditors, but before shareholders.

The Sub-Fund may also invest up to 10% of its net assets in each of the following categories: (i) ABS/MBS instruments, (ii) defaulted/distressed securities as a result of the potential downgrading of the issuers (i.e. securities which are highly vulnerable to non-payment and the rating of which is below "CCC" according to S&P's rating or the equivalent by any other agency), (iii) UCITS and/or other UCIs (including those managed by Tikehau Investment Management), (iv) equity markets, either directly by means of shares in companies of all market capitalisations and all geographic regions, through UCITS, UCIs or financial derivative instruments. For hedging or exposure purposes, the Sub-Fund may invest up to 100% of its net assets in financial derivative instruments, such as futures, options, swaps, swaptions, forwards, single or index credit derivatives swaps and Contracts for Difference. It may also invest in efficient portfolio management techniques. The Sub-Fund may invest its excess cash in term deposit accounts. These deposits may amount to up to 100% of the Sub-Fund's assets.

The range of sensitivity to interest rates will lie between 0 and 6.

Shareholders may redeem Sub-Fund units or shares daily on request, in accordance with the provisions of the prospectus.

What are the risks and what could I get in return ?

Summary risk indicator:

The risk indicator assumes you keep the product for 3 years depending on the recommended holding period. The actual risk may be very different if you choose to exit before recommended holding period and you may get back less in return.

Recommended holding period: **3 years**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a category of risk of between low and medium. This rates the potential losses from future performance at between low and medium, and if poor market conditions unlikely impact our capacity to pay you. This product does not include any protection from future market performance so you could lose some or all of your investment. For more information on these risks, please refer to the prospectus.

The following risks borne by the Sub-Fund and not taken into account in the indicator may have a negative impact on the Sub-Fund's net asset value:

For a description of all the risks, please refer to the Sub-Fund prospectus. The materialisation of one of these risks could lead to a drop in the net asset value of Sub-Fund.

Performance scenarios:

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a benchmark over the last 10 years.

Recommended holding period: 3 years Example of an investment: 10,000 €			
Scenarios		If you exit after 1 year	If you exit after 3 years
Minimum	<i>There is no minimum guaranteed return. You could lose all or part of your investment.</i>		
Stress	<i>What you might get back after costs</i>	5,350 €	6,526 €
	Average return each year	-46.50%	-13.26%
Unfavourable	<i>What you might get back after costs</i>	7,996 €	8,811 €
	Average return each year	-20.04%	-4.13%
Moderate	<i>What you might get back after costs</i>	10,336 €	10,892 €
	Average return each year	3.36%	2.89%
Favourable	<i>What you might get back after costs</i>	12,633 €	12,058 €
	Average return each year	26.33%	6.44%

This table shows the money you could get back over over 3 years under different scenarios, assuming that you invest 10,000 €. The scenarios shown illustrate how your investment could perform. You can compare them with the stress scenarios for other products. The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred during the period: 16/10/2019 - 14/10/2022.

The moderate scenario occurred during the period: 24/08/2017 - 24/08/2020.

The favourable scenario occurred during the period: 04/01/2019 - 04/01/2022.

What happens if Tikehau Investment Management is unable to make the payments?

The Sub-Fund jointly owns financial instruments and deposits separately from the Management Company. If the latter failed, the product's assets held by the custodian would not be affected. If the Custodian failed, the risk of a financial loss on the product would be mitigated by the legal segregation of the custodian's assets from the product's assets. Any losses are not covered by an investor compensation or guarantee system.

What are the costs ?

The person who sells you this product or who provides advice on it may charge you additional fees. If so, said person shall inform you of such fees and of the impact they have on your investment.

Costs over time:

The tables show the amounts taken from your investment in order to cover the various types of costs. These amounts depend on the amount that you invest, the time during which you hold the product, and the product's returns. The amounts indicated here are illustrations based on an example of invested amount and various possible investment periods.

We have assumed that:

- during the first year you would get back the amount that you invested (0% annual return);
- for the other holding periods the product performs as shown in the moderate scenario;
- 10,000 EUR are invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	92 €	304 €
Impact of annual costs (*)	0.92%	0.95% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the end of the recommended holding period your average return per year is projected to be 3.8% before costs and 2.9% after costs. We may share the costs with the person selling the product to you to cover the services they provide to you. This person will inform you of the amount, where applicable.

Composition of costs:

One-off entry or exit costs		If you exit after 1 year
Entry costs	We do not charge an entry fee for this product, but the person selling you the product may do so.	until 0 €
