 Subscription fees paid to the fund : None  
 Redemption fees paid to the fund : None  
 Management fees : 1.00%  
 Performance fees : 10.00 % of the annual performance net of management fees above the Euribor 3 months + 100 pb over a reference period of five years, provided that this performance fee is greater than 0 during the reference period in question. The actual amount will vary depending on how well your investment performs.  
 Initial minimum subscription : € 100.00  
 Liquidity : Daily  
 Subscription/Redemption : Daily before 12:00 pm (LUX)  
 NAV : Unknown  
 Payment delivery : D+2

**PROSPECTUS BENCHMARK**

Annualized performance greater than Euribor 3M + 100 basis points, net of management fees, over a minimum investment period of 12-18 months. The Sub-Fund is actively managed and refers to a benchmark indicator exclusively as an ex-post performance indicator and, where relevant, for the purpose of calculating the performance fee.

**PERFORMANCES**

Past performance does not predict future results, displayed net of management fees in the Sub-Fund's reference currency (according to the currency of the State of residence of the investors, the returns may increase or decrease as a result of currency fluctuations). The historical performance displayed during this period, up to September 1st, 2020, relates to the historical performance of a French-domiciled UCITS fund managed by Tikehau Investment Management that was merged into the Sub-Fund on that date. The Investment objective, strategies, and risk profile of this previous fund were very similar to those of the Sub-Fund. The achievement of the investment objective is not guaranteed.

**RISKS**

The main risks of the Sub-Fund are the risk of capital loss, counterparty risk, liquidity risk, sustainability risk and credit risk (the Sub-Fund can invest 35% of its assets in bonds with low credit quality, it therefore carries a very high credit risk). For a full and detailed description of all risks, please refer to the Sub-Fund's prospectus available on the Company's website. The materialisation of one of these risks could lead to a drop in the Sub-Fund's net asset value.

Please refer to the fund's prospectus and KID, and if necessary, contact your usual advisor before making any final investment decision.

**NEWSLETTER FEBRUARY 2026**

**TIKEHAU SHORT DURATION – R-ACC-EUR**

**MARKET OUTLOOK**

**Geopolitics.** February saw an escalation in the Middle East: the United States and Israel launched strikes on Iran on 28 February, mostly outside market hours, limiting their impact on monthly performance, but tensions still caused Brent crude to rise by 2.5% over the month (to \$72.48/bbl, a seven-month high). On the trade front, the US Supreme Court ruled that the IEEPA tariffs imposed in 2025 were unconstitutional, forcing the Trump administration to introduce a blanket 10% tariff for 150 days. The EU suspended ratification of the new trade agreement with the United States.

**Macroeconomics.** US growth showed remarkable resilience, with net job creation of 130,000 in January and the ISM manufacturing index at its highest level since 2022. Higher-than-expected PCE inflation prompted investors to revise downwards the likelihood of rapid monetary easing, with the probability of a rate cut in June falling from 87% to 64%. In Europe, inflation remains below the ECB's target, despite preliminary figures in France and Spain surprising on the upside.

**Central banks.** The Fed remained cautious in the face of surprise inflation, leading to a decline in the prospect of rate cuts in H1. Long-term rates fell sharply: the US 10-year yield recorded its biggest monthly decline (-30bp to 3.94%) in a year, while the German 10-year Bund fell to 2.64% (-20bp). In Japan, the yield on the 10-year JGB fell for the first time in eight months (-13bp), reflecting an overall easing in sovereign bond markets.

**Financial markets.** Non-US equities posted solid performances (Eurostoxx 50 +3.2%, Nikkei +10.4%, MSCI EM +5.5%), while US equities declined (S&P 500 -0.8%) under pressure from technology stocks (Magnificent 7 -7.3%). In general, AI was the focus of discussion in February, particularly due to the accelerated launch of new tools and concerns about the potential impact of AI on employment and valuations in various fields, leading to a significant decline in equities and bonds in several sectors such as software, legal, asset management and financial services. Despite this, credit indices still posted positive performances (EUR HY +0.30%, EUR IG +0.55%), thanks to the downward movement in interest rates, while risk premiums widened (+5bps on average on HY and +8bps on IG). Precious metals benefited from an upward trend (gold +7.9% to \$5,279/oz; silver +10.1%), in stark contrast to the fall in Bitcoin (-14.7%).

**Positioning.** In February, Tikehau Short Duration performed in line with the ER01@ (+0.19%) and H1EC@ (+0.21%) indices, used for information purposes only. The interest rate duration remains under control at 0.95 years, close to our one-year limit and lower than that of the indices, which is between 1.6 and 1.8 years. Due to this lower duration, in a context of falling interest rates, the fund's Investment Grade and Senior Financial segments underperformed the index. However, this underperformance was offset by the strong performance of High Yield and subordinated financials.

We continued to initiate new positions in high-quality high-yield issuers whose refinancing prospects for 2026 appear clear to us (e.g. Biogroup and AMS). We reduced our exposure to names affected by concerns about the disruption of AI, particularly Engineering and Lutech, to avoid the associated volatility. Despite this, exposure to high yield remains at 31%. Exposure to subordinated financial securities increased slightly to 23%, balanced between AT1/RT1 and T2. We continued to buy AT1s that we believe are likely to be called in early 2027, to replace those that are due to be redeemed in the coming weeks.

 Average coupon<sup>4</sup> : **4.5%**  
 Average rating<sup>5</sup> : **BBB**

<sup>1</sup> The actuarial yield (YTW) and yield to maturity (YTM) are characteristics of the portfolio as of the date of this document: they are in no way a management objective, nor a guarantee, nor a promise of yield or performance, and are not a reliable indicator of performance. They are calculated excluding fees, potential hedging costs, and issuer defaults. The YTM is a weighted average of our estimates of the yields of the bonds held until their maturity and the YTW as a weighted average of our estimates of the yields of the bonds held until their probable call date (estimated by Tikehau IM). They may differ from the performance achieved at the end of the product's life, notably depending on the reinvestment conditions of cash generated by possible repayments or refinancings between their effective dates and the end of the product's life and are subject to market risks. Net yields after fees will always be lower. Yields expressed in another currency are calculated by applying forward exchange rate curves to estimate the future cash flows of the bonds in the currency of the share class.
